

TEAM QWERTY

FOODER

WHAT IS FOODER?

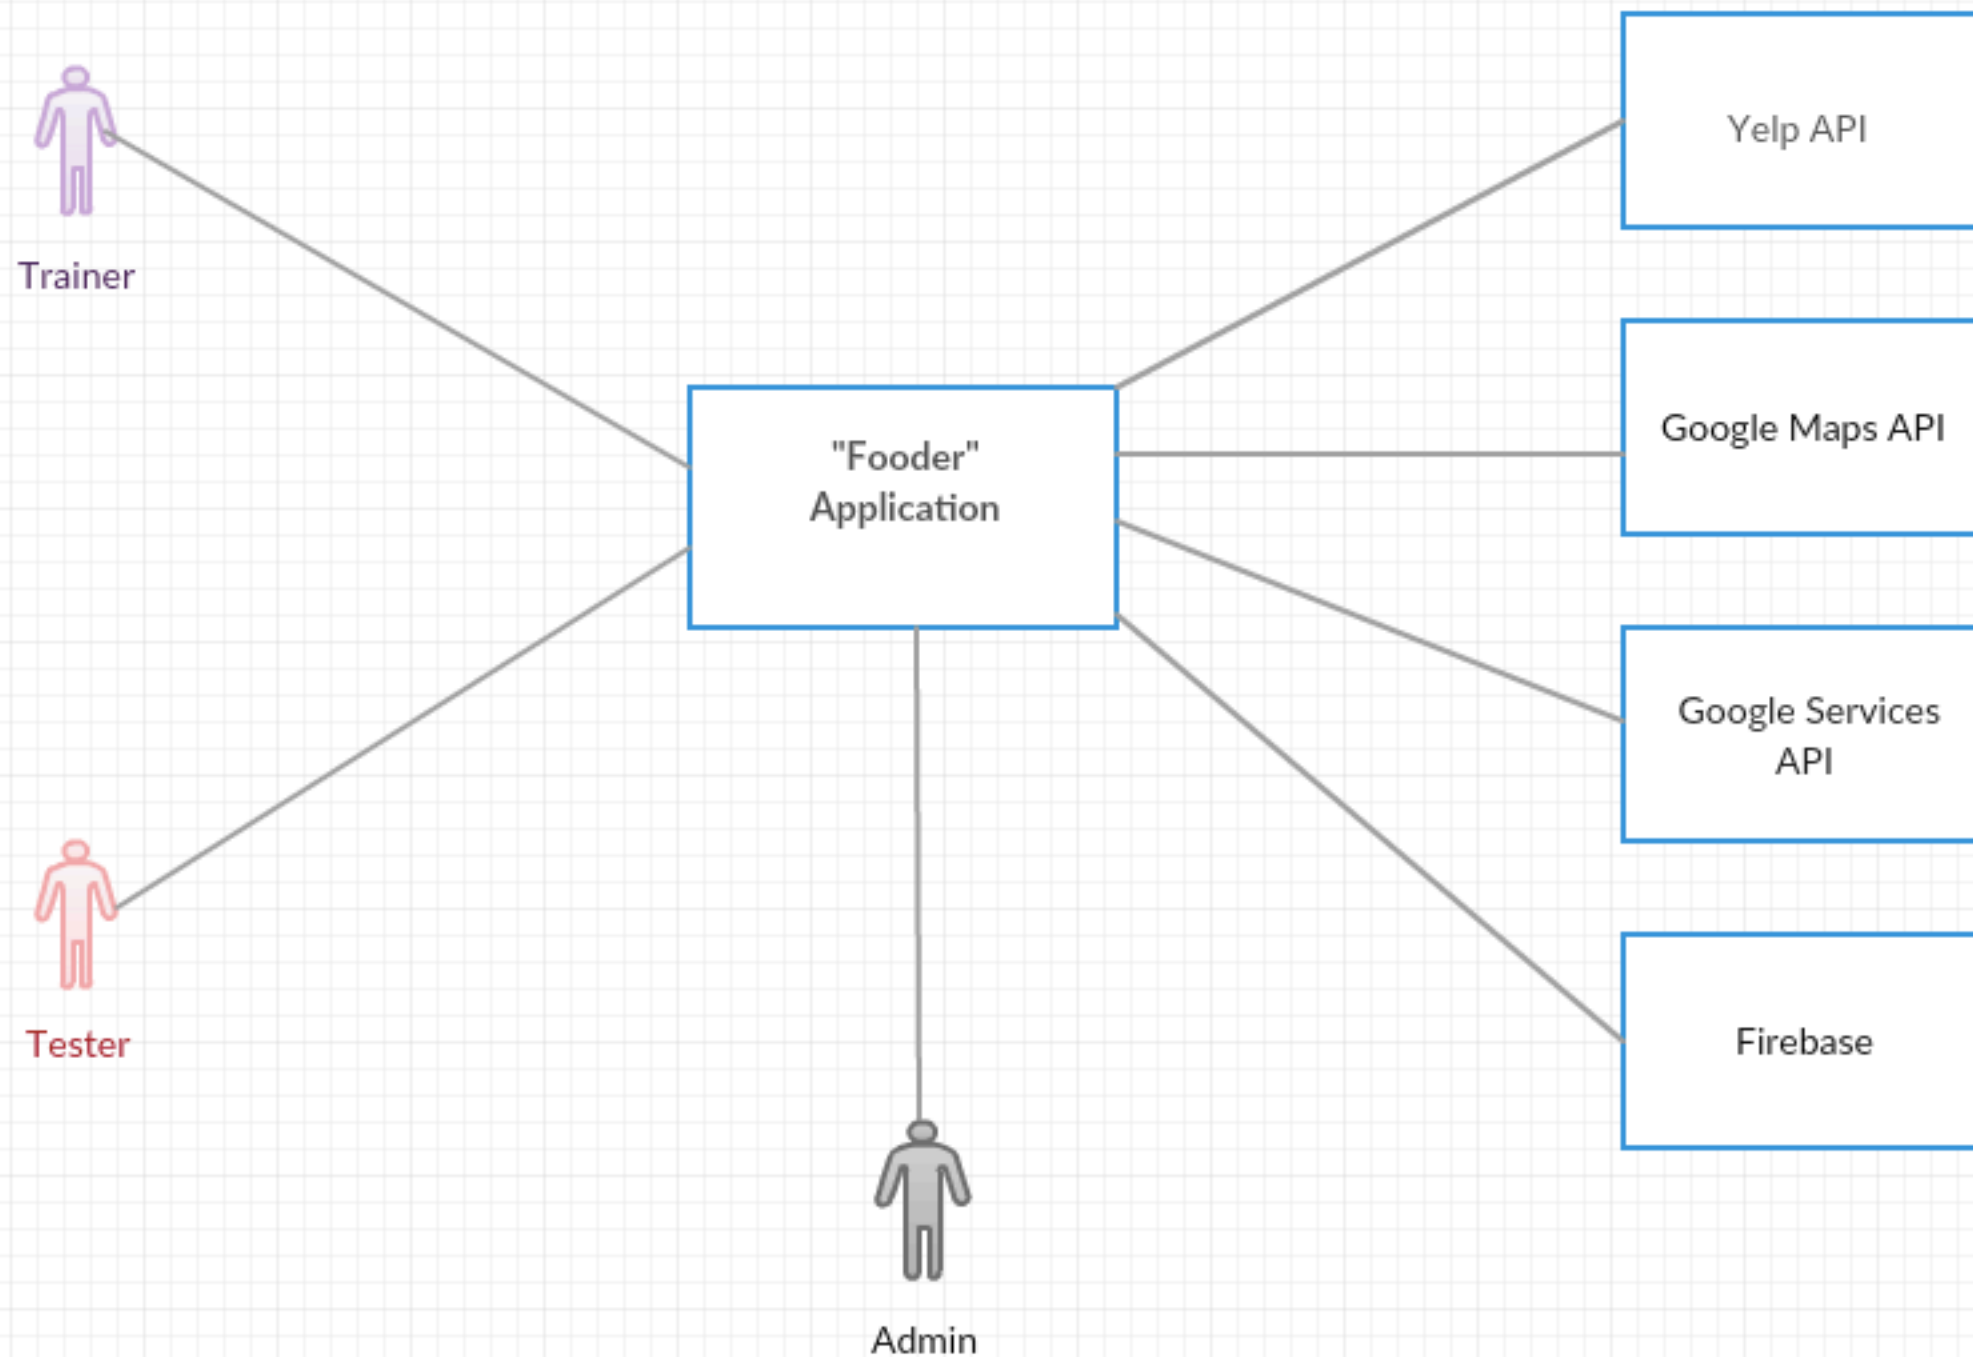

TINDER BUT WITH FOOD.

Team QWERTY

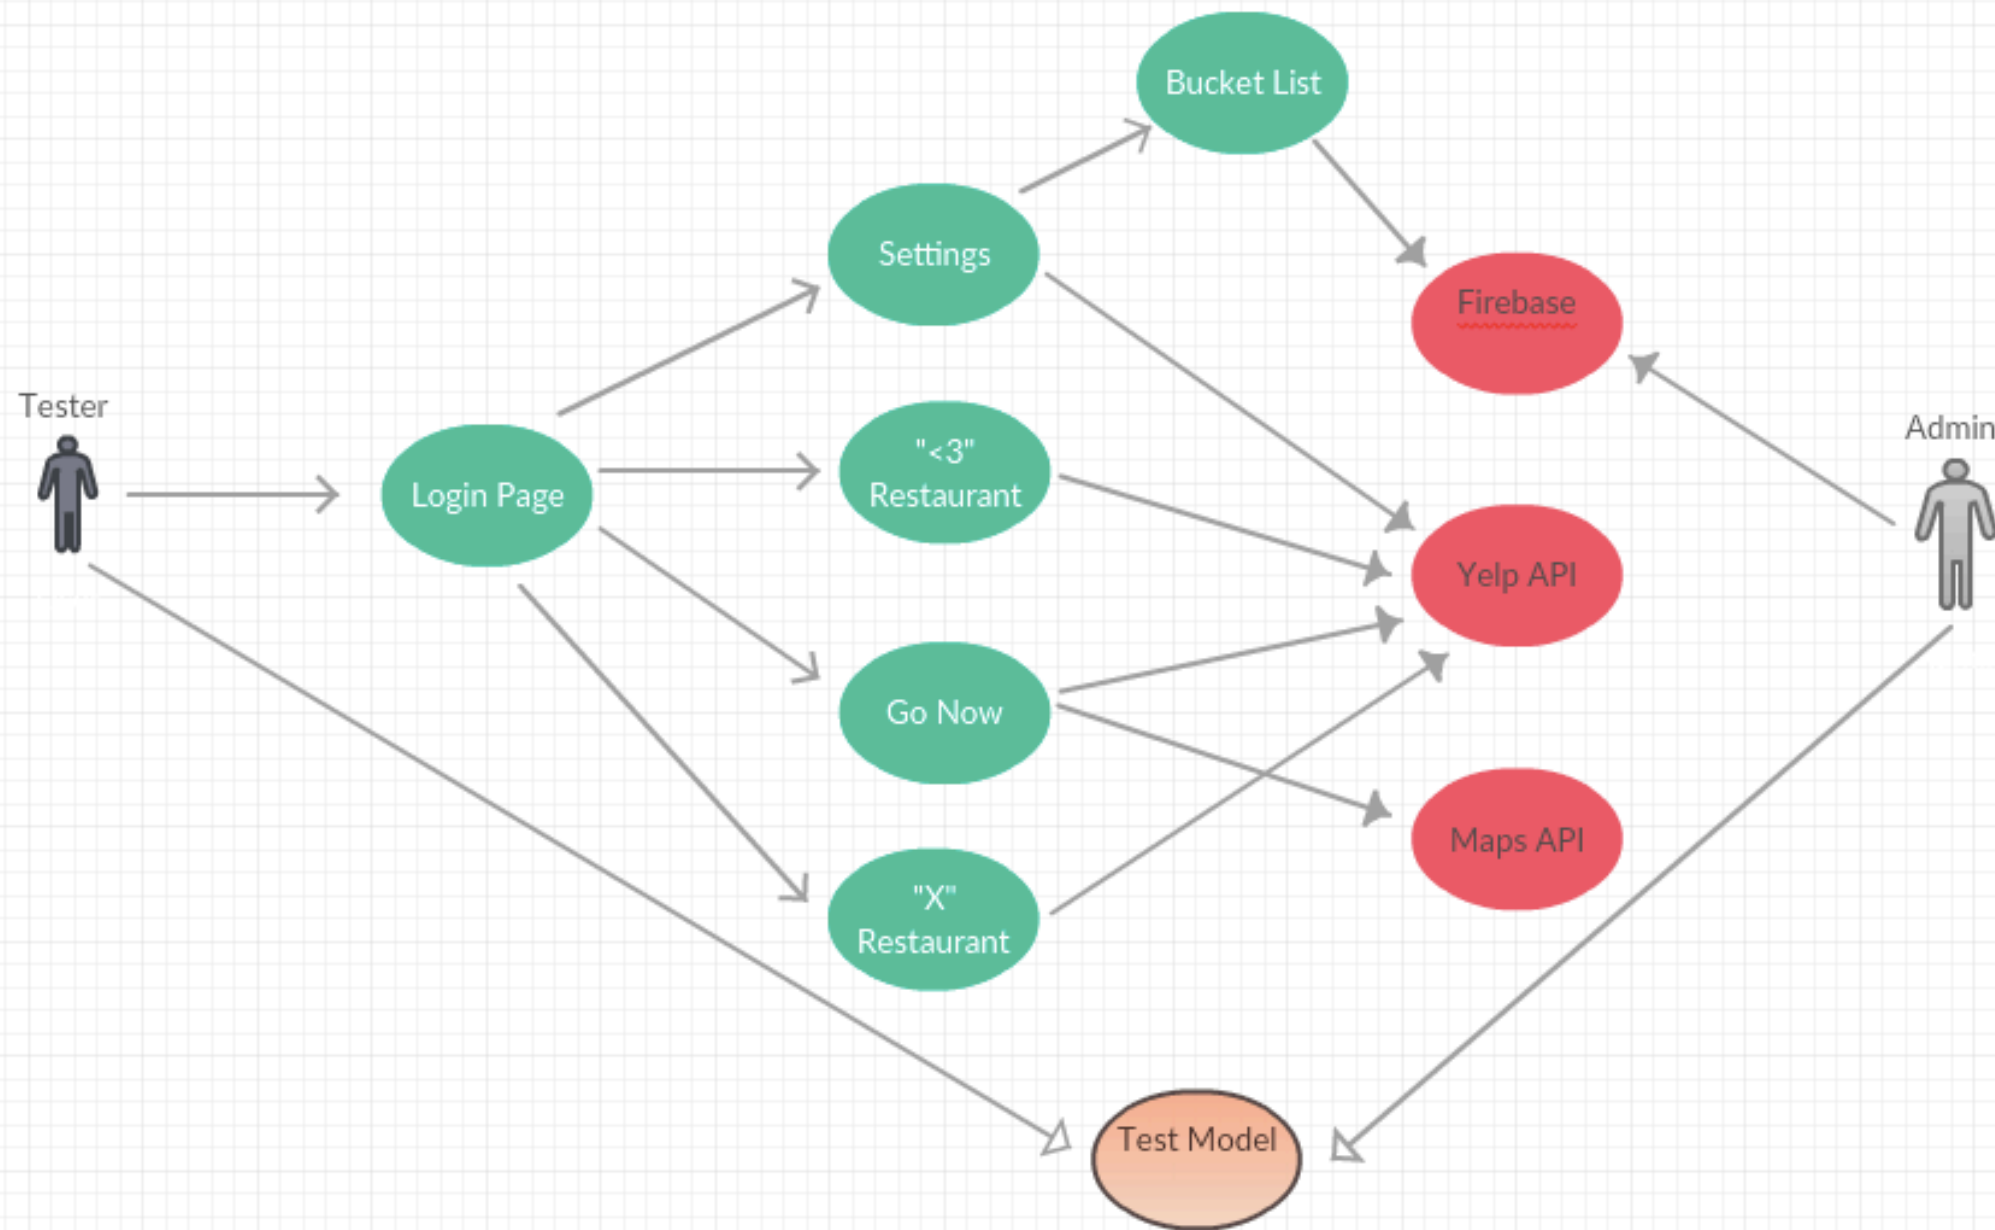

RATIONALE FOR OUR PROJECT? WHY FOODER?

- ▶ The combination of two popular apps to help the popular question: "What do you want to eat?"
- ▶ Eliminate the amount of times someone can tell you, "I don't know"
- ▶ Makes an annoying task "fun" instead of scrolling down lists of Yelp

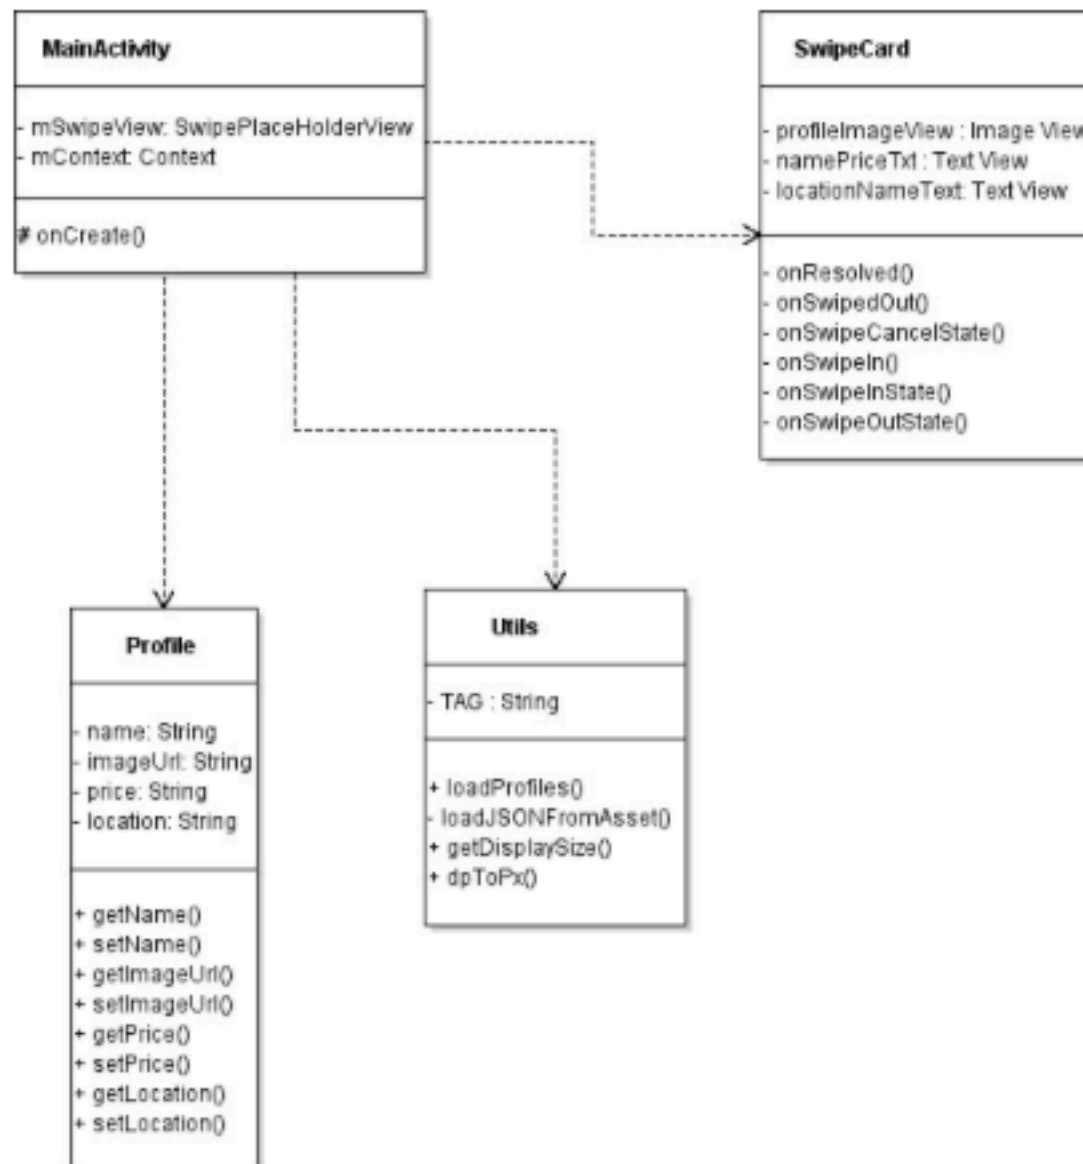

ARCHITECTURE: SYSTEM CONTEXT

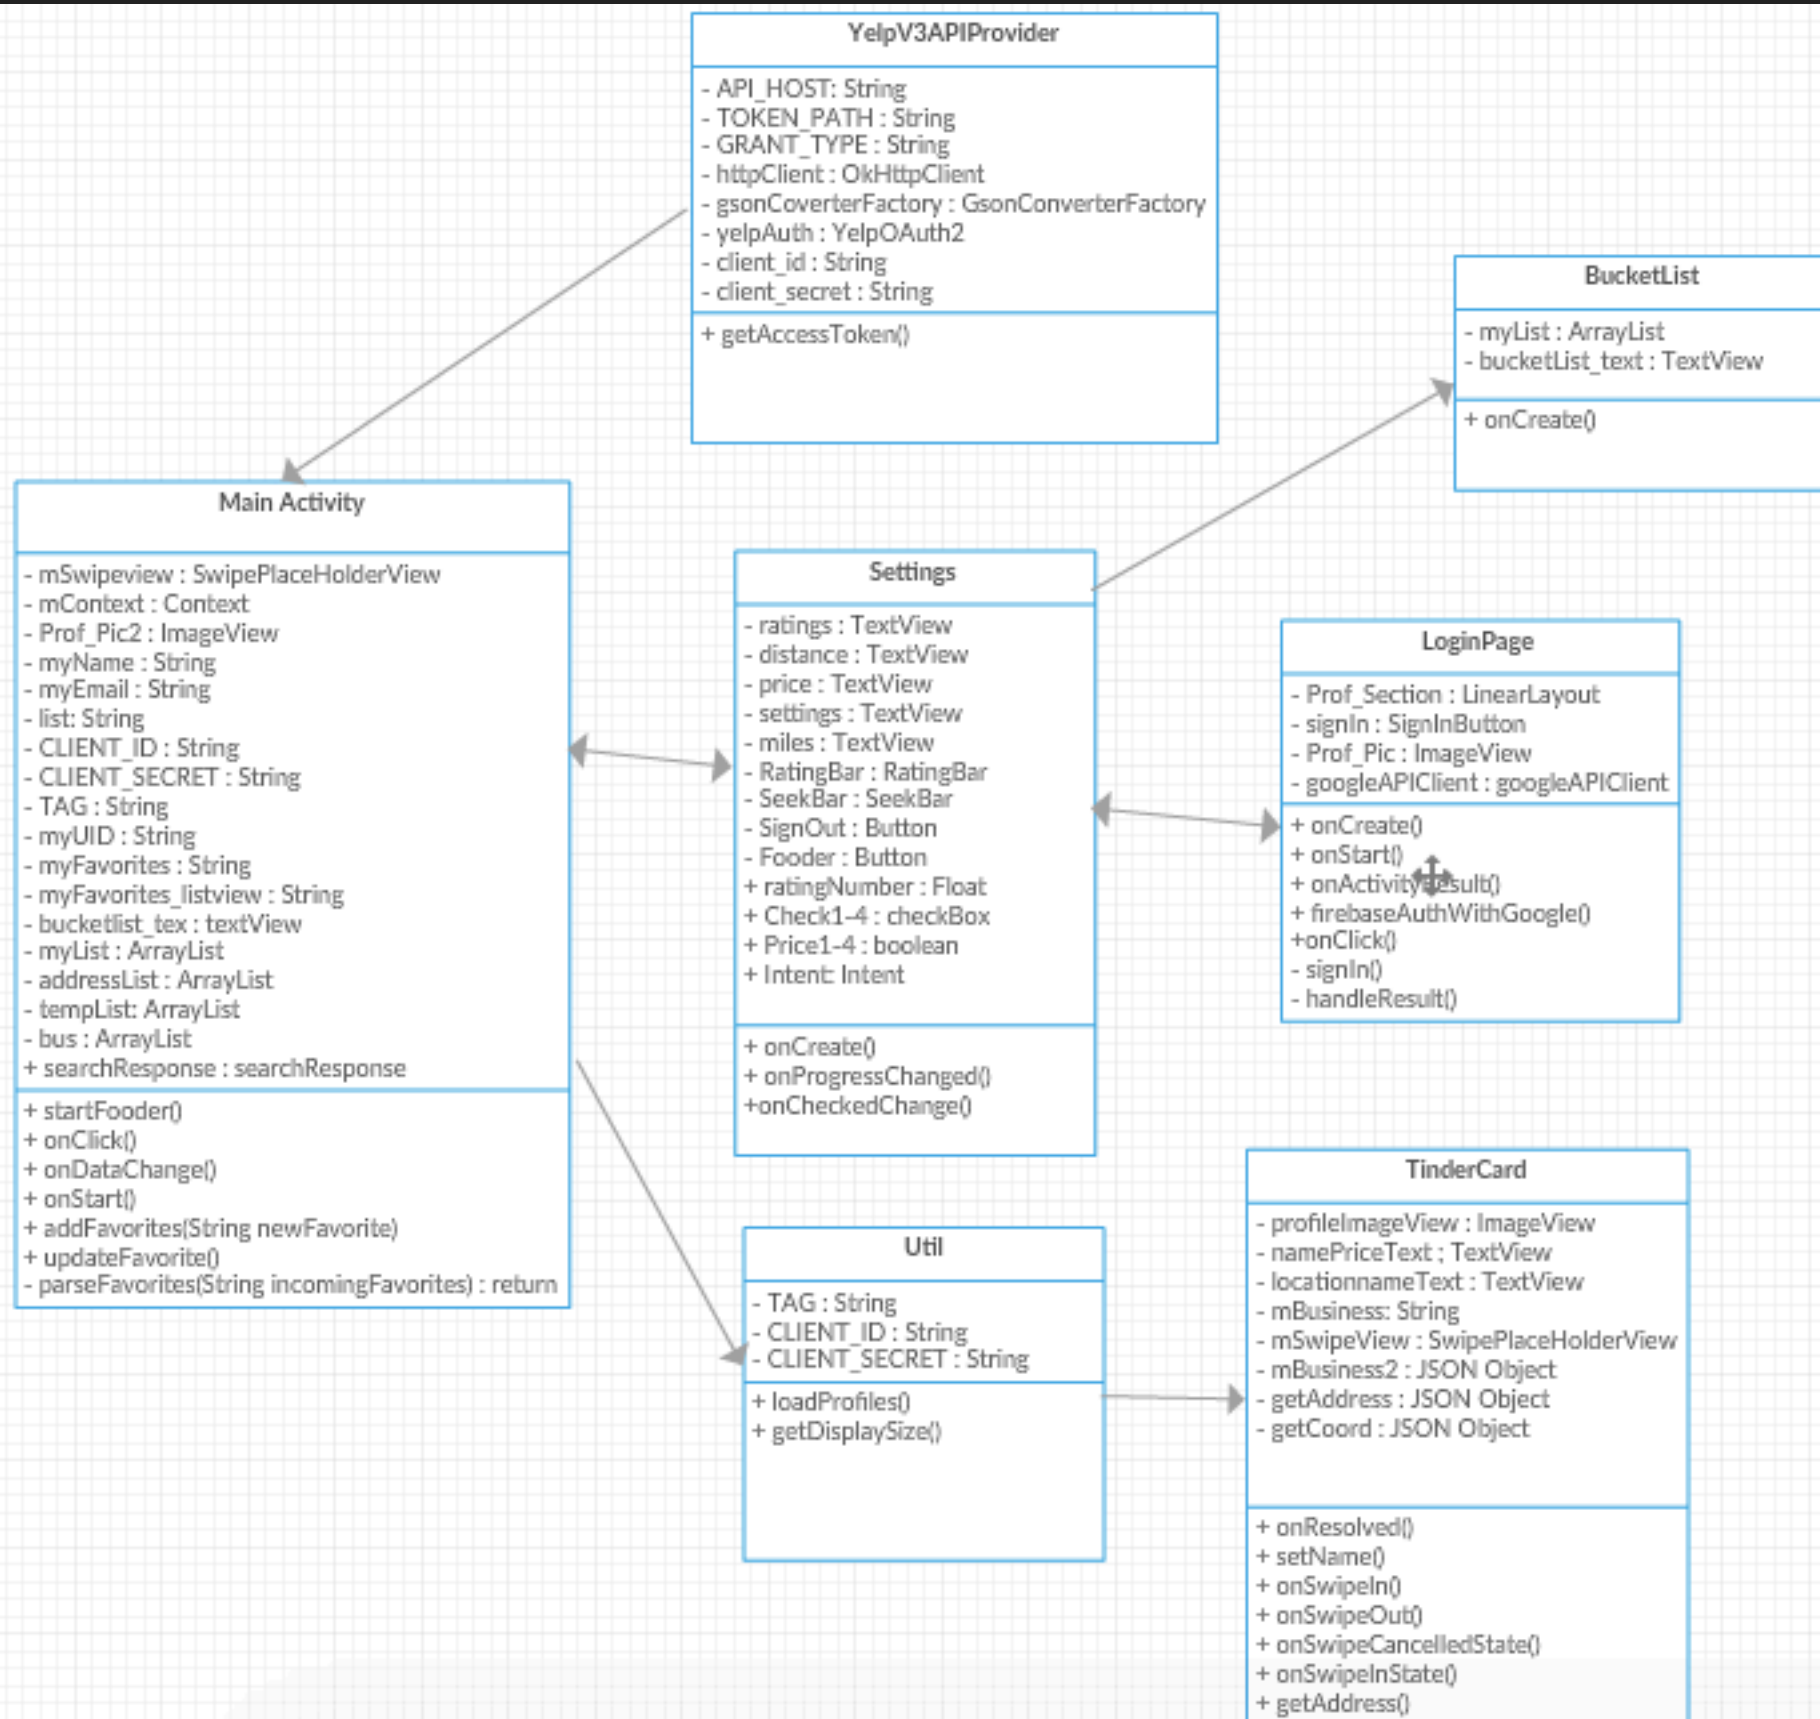

ARCHITECTURE: USE CASE DIAGRAM

ARCHITECTURE: CLASS DIAGRAMS BEFORE...

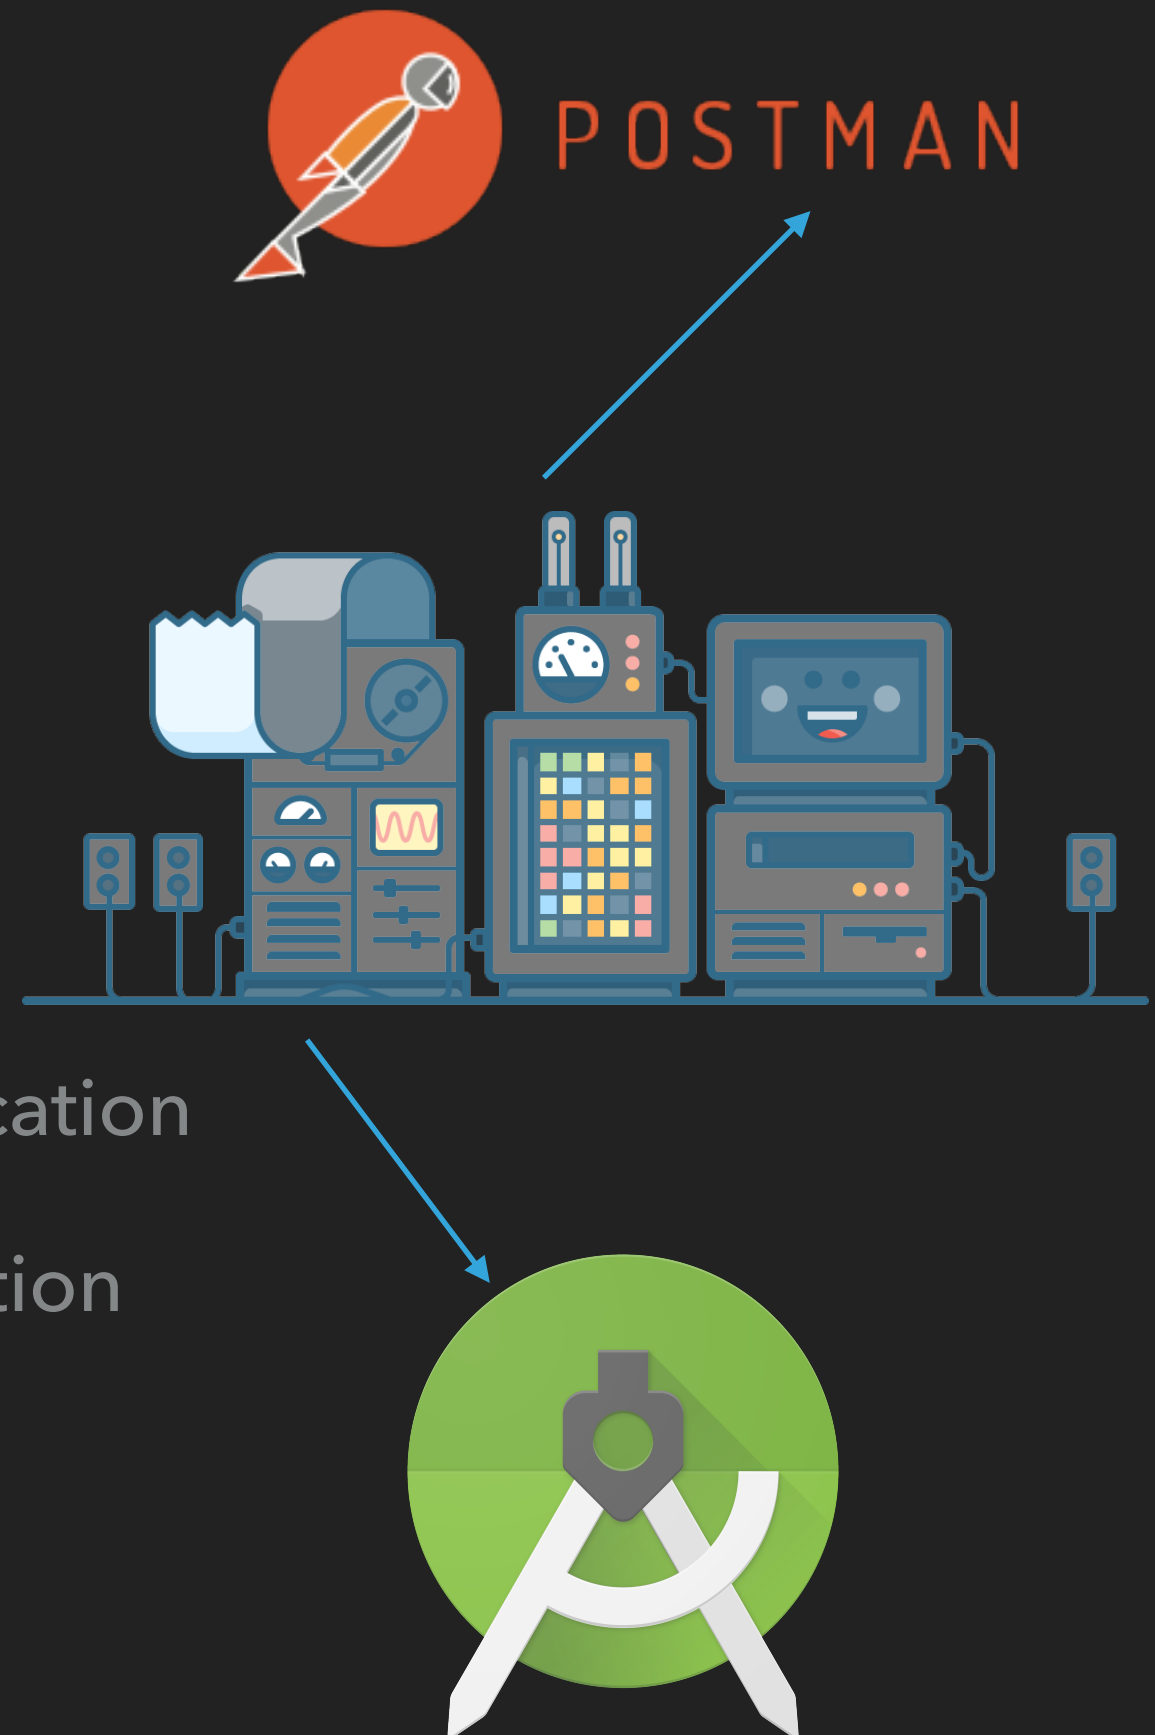

CLASS DIAGRAM NOW...

TEST PLANS AND CASES

- ▶ Tested in increments
- ▶ Tested in Postman for YELP API
- ▶ One "Course of Action" at a time
 - ▶ Test 1: Tinder Swipe Cards
 - ▶ Test 2: Heart and "X" button
 - ▶ Test 3: Pull from Yelp API
 - ▶ Test 4: Map Button : Current Location
 - ▶ Test 4.5: Pull Restaurant Location
 - ▶ Test 5: Settings
 - ▶ Test 6: BucketList

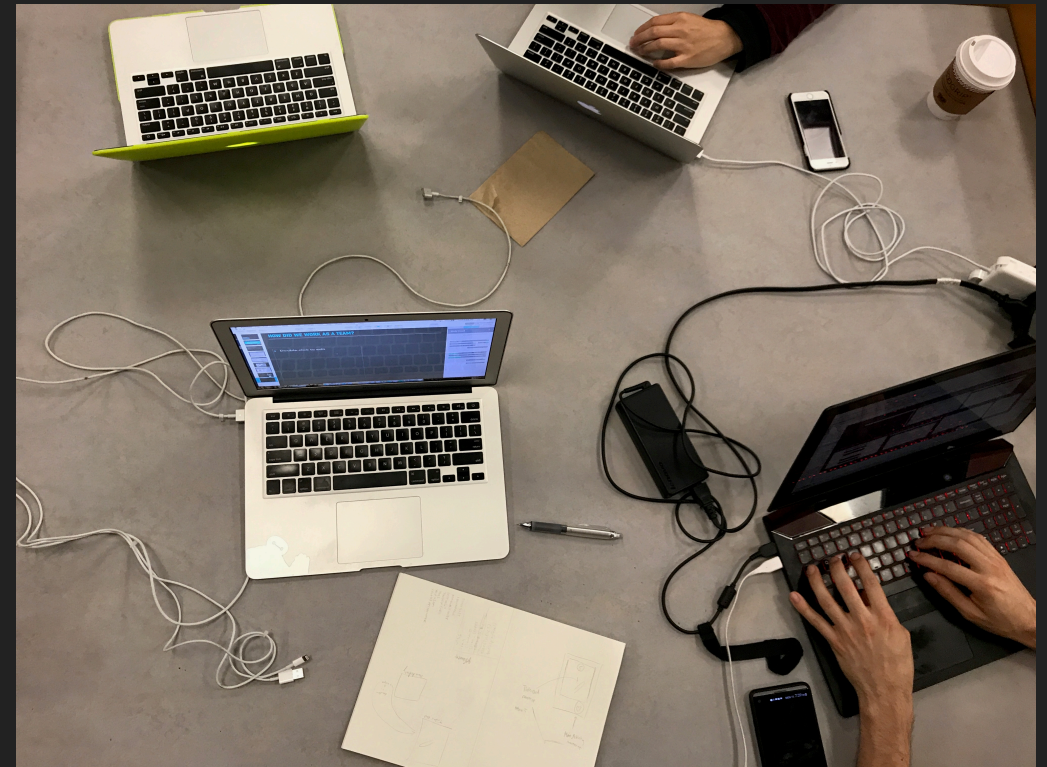

NEXT STEPS : FUTURE GOALS

- ▶ Reject swipe and X button need to remove the restaurant card from the viewable list. (Blacklist)
- ▶ (WIP) Add a new set of cards once the user swipes all the cards away
- ▶ (WIP) Save user settings onto Firebase

HOW DID WE WORK AS A TEAM?

- ▶ Met every week @ least once
 - ▶ Wednesdays at 3:00 PM on either the 4th or 0th floor of MLK library
- ▶ Near the end of our semester:
 - ▶ Mondays and Wednesdays @ 3:00 PM until 9-10 PM
- ▶ Documentation -> Google Drive
- ▶ Communication -> Texting
- ▶ Code Management -> GitHub
